PROFILE

Computer Science student and full-stack product builder focused on practical web systems from UI design to backend logic and deployment.
Strongest work: **Acadex**, a school management platform prepared for real-school pilot testing, and **RestaurantOS**, a restaurant operations platform prepared for restaurant workflow testing. Writes TypeScript/Python, thinks in systems, and builds with production discipline.

CORE STRENGTHS

Product-builder mindset: turns practical problems into working systems, not just tutorial projects.
Full-stack execution: connects UI, API logic, authentication, database models, and deployment into complete workflows.
Growth-focused engineering: uses independent study, AI-assisted workflows, and iterative debugging to improve speed and quality.

TECHNICAL SKILLS

Frontend: Next.js · React · TypeScript · Tailwind CSS · Framer Motion · GSAP
Backend: Node.js · Express · REST APIs · NextAuth.js · Python
Database & ORM: PostgreSQL · MongoDB · Prisma
Tools: Git · GitHub · Vercel · pnpm · VS Code · GitHub Copilot
Currently Learning: Docker · tRPC · AI integration patterns · system design

CORE COMPETENCIES

Product Development · System Design · Problem Solving · API Development · Database Design · Responsive UI Development · Technical Communication · Product Leadership

SELECTED PROJECTS

Acadex - Full-Stack School Management Platform | Live: acadex-ed.vercel.app
Built and deployed a school management system for student records, grades, attendance tracking, fee management, and administrative dashboards.
Designed core workflows around real school administration needs and prepared the platform for pilot testing with schools. Developed with Next.js, TypeScript, Tailwind CSS, MongoDB, and Vercel, focusing on responsive UI and organized modules.

RestaurantOS - Restaurant Operations System | Live: restaurant-os-ug.vercel.app
Built and deployed a restaurant management system covering orders, checkout, kitchen display, purchases, inventory, receipts, reports, staff roles, and branch-level operations.
Structured modules to support front-desk, kitchen, stock, staff, and management workflows in one practical operations platform.
Developed with Next.js, TypeScript, Prisma, PostgreSQL, and Framer Motion, with attention to clean UX and operational flow.

Supporting Projects - Additional proof of range
Digital Drift Blog: modern blog platform with content management, authentication, and clean reader experience using Next.js, React, TypeScript, Tailwind CSS, MongoDB, and NextAuth.js.
WhatsApp Scheduler Bot: Node.js automation bot for scheduled reminders, notifications, and alerts using whatsapp-web.js.
Secure Password Generator: Python CLI tool for cryptographically secure passwords, passphrases, entropy scoring, strength checks, and pattern avoidance.

EDUCATION

Bachelor of Science in Computer Science - Victoria University, Kampala | Year 2, In Progress
Independent Study: Full-stack web development, DevOps fundamentals, system design, AI-assisted development workflows, databases, and practical software architecture.

INNOVATION, LEADERSHIP & ENTREPRENEURSHIP FOCUS

Software Engineering · Product Development · Technology Innovation · Entrepreneurship · Leadership · Artificial Intelligence · Systems Thinking · Educational Technology · Robotics
Focus: building practical software systems that solve real-world problems through modern web technologies, thoughtful product design, and disciplined independent learning.
